Subject:	Agriculture Activity

Dear Nathan,

Following our latest conversations and meetings, I spoke with both EB and Shalom. We all believe you are the type of partner we are looking for, we would love to work with you, and we would like to suggest a new model for the mutual venture. In this model, where some of the partners are located in Israel on a regular basis, and some partners are overseas, it is required that we agree on the module, start acting accordingly and at the same time start preparing the necessary documentation.

We agreed on Nathan's vision which is mainly detailed screening of the market and its opportunities, concentrating on and examining one company, investing in the most attractive one and evolving through the invested company.

Here are the major points we would like to bring up:

- We shall set up the relations between us in a new company that will be held 40% by Nathan, 20% by EB, 20% by Shalom and 20% by myself. By dividing the ownership between the 4 of us, there is no risk of a deadlock.
- The investment that shall be made by Nathan will be considered as 75% Nathan's owner's loan and 25% ongoing premium for his pre-allocated 40% shares.
- Shalom and myself will manage the routine activity here in Israel on a one full workday per week basis, in order to screen the market, get the company on the road and present the various opportunities we come up with for investments. For this, will shall be paid $7,500 + VAT together per month by invoice, including all local expenses.
- Any agriculture activity will be exclusively handled by this company.
- We believe that the combination of the 4 of us together with EB's commitment to help the activity of the company in the international arena can make us a key player in distributing the technological capabilities of Israel and globally aiding the food security issue.

Nathan, please let us know if this structure is of interest to you and you would like to go forward. If so, let's set up a meeting for the 4 of us before you leave.

Looking forward to hearing from you.

Best regards,
Doron
